Gegenstand Objet Object	UV-Radiometer/ Lux-Meter	
Typ / Serien Nr Type / N° de serie Model / Serial N°	Multimeter #MUM61	
Hersteller, Fabricant Manufacturer	<i>CoFoMeGra</i>	
Zubehör Accessoires Accessories	<i>5 sensors: #UV1111, #UV2068, #UV3199, #UV4017, #UV5081(BST)</i>	
Bemerkungen Remarques Remarks	<i>Calibrated for irradiation by Xe-lamp in Solarbox (Filter outdoor)</i>	
Kalibrierdatum Date d'étalonnage Date of calibration	11.04.2008	

Dieses Kalibrierzertifikat dokumentiert die Rückverfolgbarkeit auf nationale Normale zur Darstellung der physikal. Einheiten (SI).
 Ce certificat d'étalonnage confirme le raccordement aux étalons nationaux qui matérialisent les grandeurs physiques (SI).
 This calibration certificate documents the traceability to national standards, which realize the physical units of measurements (SI).

Messresultate, Messunsicherheiten mit Vertrauensbereich und Messverfahren sind auf den folgenden Seiten aufgeführt und Teil dieses Zertifikates
 Les résultats, les incertitudes avec le niveau de confiance et les méthodes de mesure sont donnés aux pages suivantes et font partie du certificat
 The measurements, the uncertainties with confidence probability and the calibration methods are given on the following pages and are part of the certificate

1 CALIBRATION METHOD

The calibration has been executed acc. to SOP 12.04: S(integral)

To establish the calibration of the unit under test (D.U.T.) the irradiance source was measured with an absolute calibrated spectroradiometer. The irradiance in the spectral bands of the detectors under test (340nm, 420nm, 295-400nm) and the illuminance was calculated from these measurements. Then the unit under test was set to measure the same source and the deviation to the reference value was documented.

2 RESULTS OF CALIBRATION

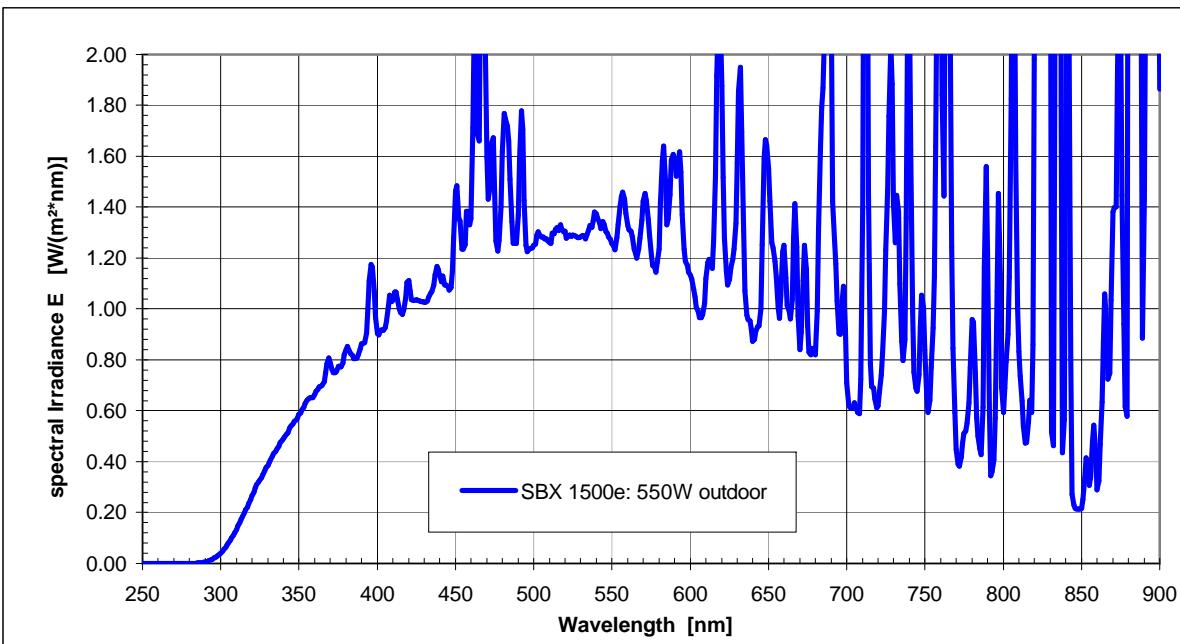

2.1 Measurement of spectral irradiance $E(\lambda)$ and Illuminance E_v

For a spectral distribution as it is emitted by a source of the type Solarbox (see graph §2.2) the following deviation of measurement values for irradiance E in the following wavelength ranges have to be reported:

SENSOR:	340nm #UV1111	295-400nm #UV3199	420nm #UV2068	kLux #UV4017
Reference ± measurement uncertain	0.489 ± 0.03	55.7 ± 3.9	1.109 ± 0.08	96.5 ± 3.86
Display D.U.T. :	0.517 ± 0.005	54.9 ± 0.5	1.144 ± 0.007	98 ± 1
Unit :	W/m²/nm	W/m²	W/m²/nm	klx
Deviation:	5.7%	-1.4%	3.2%	1.5%
Calibration factor ± uncertainty :	0.95 ± 0.07	1.01 ± 0.07	0.97 ± 0.07	0.99 ± 0.04

The instrument has not been adjusted, calibration factors may be applied.

2.2 Spectral distribution $E(\lambda)$ of test source

* The SCS-Accreditation covers the wavelength range 300 to 1100nm. Measurements with $\lambda < 300\text{nm}$ and $\lambda > 1100\text{nm}$ are outside of the accredited range of the calibration laboratory and may therefore not be considered as SCS-calibration values, although measurement methods and QM-system are identical to official SCS-calibrations

3 UNCERTAINTY OF CALIBRATION

relative measurement uncertainty of measurand in wavelength range
± 7 % 300 - <400nm
± 4 % 400 - 800nm
± 0.5 nm Uncertainty of wavelength scale

The reported expanded uncertainty of measurement is stated as the standard uncertainty of measurement multiplied by the coverage factor $k = 2$, which for a normal distribution corresponds to a coverage probability of approximately 95 %.
The uncertainty includes the contributions to uncertainty by the standards, procedures, environmental conditions and unit under test at the moment of calibration. The long term behaviour was not taken into considerance.

± 0.5 nm Uncertainty of wavelength scale

The influence of the directional response (deviation from the cosine of incidence angle, "cosine error") at other measurement geometries and the match of spectral sensitivity for measurement of other sources has not been taken into account.

4 CALIBRATION and MEASUREMENT CONDITIONS

Measuring geometry on Solarbox sample tray
Reference plane = sample tray (bottom of sensor)

Test source: Solarbox 1500e sn0703150
working conditions: Filter outdoor, 550W/m²

Temperature/Climate: Raumtemperatur: 22°C ± 1°C rel.Feuchte: 45%rH ± 10%rH Temp. Prüfobjekt: --

Measuring Instruments: Spektroradiometer #B-02 (Instrument Systems SP320D): Scanning double mono (Step1nm, FWHM 2.5nm) / Kugel nm23(Ø4", A=1cm²) / ofg425(B-02d)

7 APPENDIX: Calibration of temperature probe

Thermometric calibration is not subject of calibration laboratory accreditation by the Swiss Calibration Service.
The thermometric measurements are conducted under ISO17025 quality management system, traceability is given with SCS-calibrated thermometer

7.1 Black Standard Temperature (BST)

Reference ± measurement	Display	Deviation
20.4 ± 0.2	20.4	0.0
29.0 ± 0.2	29.0	0.0

°C

Reference ± measurement	Display	Deviation
40.2 ± 0.2	40.1	-0.1
50.3 ± 0.2	50.2	-0.1

°C

The deviation D.U.T to reference are within typical tolerance of black standard thermometers.

7.2 Traceability

reference standards: Hg - Thermometer Hediger, sn 2001-9004 (#A-07) / SCS011 #3587 / Cal.due 5.2011
